

# Skillsportsprep Wearables (Patent Pending)

- Wearable resistance system to improve speed, control, neuromuscular performance

# Problem

- Training lacks precision
- Current methods inefficient
- No scalable performance system

# Solution

- Modular micro-load wearable system
- Zone-based resistance
- Sport-specific application

# Market Opportunity

- Youth sports + performance training
- High frequency usage
- Large repeat market

# Product

- Wearable sleeves + modular weights
- Adjustable zones
- Scalable across sports

# Business Model

- Retail: \$99–199
- COGS: \$40–70
- High margin
- Upsell: premium tiers

# Traction

- Patent pending
- Prototype stage
- Initial investor outreach

# Raise

- \$100K MVP round
- Prototype + pilot + validation

# Return

- 1.75x structured payout
- 9–18 month target

# Vision

- Standard in performance training
- Hardware + system + data
